

Update August 2026 – Pensions Dashboard

The UK Pensions Dashboards are secure online tools currently being built to let individuals view all their workplace, personal, and State Pension information in one place. The first public dashboard will launch via MoneyHelper, with all required pension schemes mandated to connect by October 31, 2026.

Whilst this is obviously a good idea as a small provider, we would need to use a 3rd party system to feed data to the dashboard and this was going to be cost prohibitive (members would have been liable for an additional fee of circa £1,000). Therefore, after careful consideration the Financial Conduct Authority has agreed to waive this requirement for the CTPP SIPP.

We hope members will understand this decision.

You should review all your pension provision on a regular basis.

If a bespoke SIPP like the CTPP SIPP is no longer appropriate for your circumstances please take advice on suitable alternatives.
